EDUCATION

DENISON UNIVERSITY — **Granville, OH**
Bachelor of Arts, Computer Science and French — May 2024

QUEEN MARY UNIVERSITY OF LONDON — **London, UK**
Study Abroad Program in Computer Science and Business Management — September 2022 - January 2023

WORK EXPERIENCE

CHRONOGRAPH

Solutions Engineer — **March 2026 - Present**

- Led resolution of high-priority production issues for enterprise private-equity clients, delivering data fixes and workflow improvements across 300+ tenant PostgreSQL schemas.
- Executed large-scale data remediation projects affecting tens of thousands of financial records, coordinating validation and deployment with zero production rollbacks.
- Partnered cross-functionally with Engineering and Customer Success to troubleshoot platform issues, identify root causes, and improve operational processes across Rails, SQL, GraphQL, and frontend systems.

Data Analyst — **February 2025 - March 2026**

- Streamlined administration and analytics of financial data across 10,000+ portfolio companies, enabling GPs and LPs to visualize performance and make data-driven capital decisions.
- Developed Java applications for bulk document downloads supporting diligence work; wrote scripts to identify gaps in historic investment coverage..
- Built and maintained Retool dashboards tracking workflow performance, document processing pipelines, task status, and overdue items–reducing manual overhead for the operations team.
- Wrote and optimized SQL queries and scripts to support fund onboarding, data quality checks, and client troubleshooting across 350+ tenant schemas.
- Learning GraphQL to support technical client inquiries and API-related questions.

REVROAD CAPITAL

Sustainable Investments Analyst Intern — **May 2024 - September 2024**

- Conducted market research and in-depth analysis of green tech startups, leveraging Python and XML to process datasets and evaluate financial health, business models, and market potential — directly contributing to a 20% increase in qualified investment leads.
- Partnered with senior analysts on 150+ investment opportunities, providing precise, data-driven insights that shaped RevRoad's portfolio strategies.
- Designed financial models to evaluate early-stage climate-tech ventures, helping identify three high-potential investments that advanced to the next funding stage.

NATIONAL RESEARCH GROUP

Market Research Intern — **December 2023 - April 2024**

- Led a 10-member research team focused on sustainability policy, implementing data-driven methodologies to identify trends across emerging sustainable markets in the U.S, contributing to a 15% increase in actionable insights for client reports.

LEYLINE

Project Manager — **May 2022 - September 2022**

- Developed monetization strategies for an eco-friendly blockchain platform, boosting user engagement by 25% through a grassroots campaign that attracted 200+ student users in the first month.
- Built a customer service dashboard in Google Sheets and Airtable to streamline support metrics, improving response times and user retention.
- Coordinated partnerships with student organizations and environmental groups, driving early adoption and brand awareness in the platform's launch phase.

SKILLS

- Ruby, SQL, Python, JavaScript/TypeScript, React, Snowflake, Sentry, Claude Code,
- Working Proficiency in French and German
